Falbe's feedback

"Imagine lighting a lake, in mid-December, in the Chicago area. That may sound extreme, but it's just another day at ILC. We know outdoor lighting challenges better than anyone because we live them; in all seasons and every type of weather. From the thousand-acre "Illumination" at the Morton Arboretum, to small outdoor events in local communities, ILC has been there and lit that. Whether you're hiring us to light your event or renting gear from us, the ILC team is ready to help you shine."

Scott Falbe, Founder and CEO

Bright ideas

Q. Can I use an indoor lighting system for our outdoor event?

A. We don't recommend it. If you're planning an outdoor event, your gear has to handle heat, humidity and weather that can change dramatically in a matter of minutes. ILC has some excellent outdoor rated gear on the following pages. That rating means these fixtures are proven to prevent dust, debris and water from entering the light fitting. So get a true outdoor lighting system for your event.

Fast facts

The numbers tell the story: It pays to work with ILC for your event.

#1 in outdoor experience

That's huge, because it means there are no surprises when you work with ILC. All of our gear is proven and meticulously maintained and our field experts know the perfect systems for your event. Bottom line: ILC is smart, safe, uniform, trained, professional, innovative, on time and on budget.

1,500+ outdoor rated fixtures

24-hour response team

1 point person for you

25+ years of successful events

All of the outdoor fixtures in this guide are tested and trusted by ILC. And they're in our warehouse now and ready to rent. ILC has a massive range of lighting rental equipment, from conventional lighting and rigging to moving lights, LED lighting and control consoles. And every single one is approved by our factory certified technicians before it goes out to your event. We rip it apart, clean it, and test it. That's one more way we help you shine.
